

**Interpon EC:** Easy Clean powder coating

# Easy Clean powder coating

## Do you need to protect your assets from the nuisance of graffiti?

While the debate of whether graffiti is art or vandalism continues, facts showing the damage caused by graffiti are indisputable: each year many communities, private property owners and public authorities spend millions of dollars on clean-up and recoating efforts. Additionally, they suffer from reduced retail sales, property values and ridership on transit system.

“EC” stands for Easy Clean. Interpon EC is a product series that possesses anti-graffiti properties, making it a powerful shield, resistant to scratches, corrosion, and chemicals, even after several removals of graffiti.

The high scratch resistance and low porosity-absorption characteristics of the film provide outstanding permanent protection against defacement of public property. Graffiti created with spray paints or marker pens can be effectively removed, repeatedly, without sacrificing coating appearance, durability or weathering properties, using commercially available cleaning agents.

## Features and Benefits

- Easy to Clean
- Outstanding chemical resistance
- Weather and corrosion resistant
- Available in gloss to satin finish, textures\* and clear coats
- One coat application or as clear topcoat
- Zero/near zero VOC compounds

*\*a structured finish makes cleaning more difficult and thus reduces the products properties in terms of stain resistance.*

## Typical Use

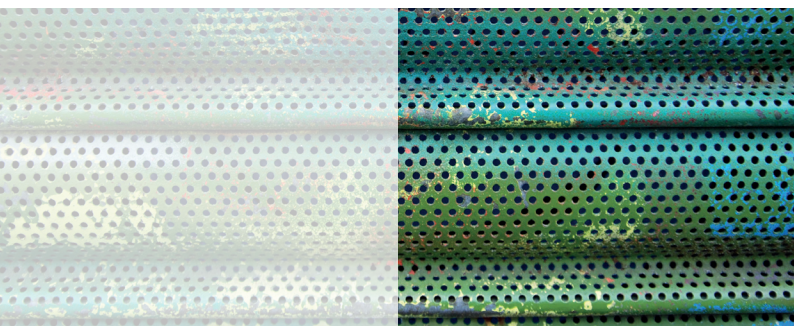

- Infrastructure for public transport
- Trains, metro, subway, trams (seats, window frames, ceilings etc.)
- Recreational equipment
- Electrical cabinets
- Roller doors
- Lockers
- Public furniture
- White boards (dry erase boards)

Cleaning Agent	Gloss	Color	Hardness
