Interpon ACE Heavy duty performance

Agricultural and Construction Equipment (ACE) vehicles and their various parts help create the realities of tomorrow; from the food we harvest to the buildings in which we live. They need to perform. They need the market's best products to provide them with the ultimate in protection, functionality and finish. Interpon powder coatings deliver the optimum performance in any conditions and any environment. They can be applied without fuss and with total efficiency. And they come from a brand whose reputation has been built upon putting people and businesses first for more than half a century.

From construction to agriculture, forestry to mining, our powder coatings are designed for the very particular demands of the ACE market. With superior corrosion and weathering protection, as well as an array of high-quality finishes and single-step coating process, Interpon's ACE range is the product of choice for vehicles often pushed to the limit of their endurance.

Whether you're looking to move away from liquid coatings and realize the benefits of powder or access the specific advantages Interpon's ACE range can provide, start a new conversation today and see how our products can support agricultural, construction and earth moving machines and equipment, and your business.

Leading benefits

Putting sustainability first

At Interpon, we're driving towards a greener, more sustainable future. Not only does our ACE powder coatings range produce no hazardous waste, including Lead, Chrome VI, Arsenic, Cadmium and Mercury, but it also allows you to benefit from high quality finishes free from Volatile Organic Compounds (VOCs).

Solutions to meet any challenge

For every requirement, Interpon has the solution you need. This means catering for any vehicle type, whether a tractor or digger, forklift or bulldozer. It means matching products up to your specific durability and corrosion-resistance needs. And it means meeting the specific requirements of OEMs with bespoke products or colors, matched to your particular need.

Flexibility throughout

Choose from a wide range of chemistries to meet any challenge, from standard or high durability polyester topcoats and dry-on-dry technology, through to hybrid and pure epoxy primers. The full polyester portfolio is available with or without TGIC.

Science made simple

The world of ACE machinery and equipment is complex. But we can provide the simple solutions you need to allow products to thrive. When it comes to corrosion, ACE primers work in combination with standard substrate pre-treatment and any Interpon ACE topcoat. When tackling chemicals, the full product range is designed to resist attack from common chemical agents such as unleaded gasoline, diesel fuel, lubricant oil, hydraulic fluids, alkali and acid solutions. And to meet mechanical requirements, all have the hardness, adhesion, flexibility and impact resistance they need.

The perfect partner

Whatever your business goals, Interpon is the perfect partner. Our global footprint allows you to access the highest quality products, wherever you are in the world; to benefit from cutting edge, innovative products produced at our state-of-the-art R&D centres; and work closely with our local teams, who can provide the personal touch your business needs.

Comprehensive product range

ACE 500 series: standard durable polyester topcoat

Available with or without TGIC, the ACE 500 series can be matched in your special company color and meet your standard durability needs. The range provides consistently high protective qualities, UV stability and mechanical performance.

ACE 1000 series: high durable polyester topcoat

Designed for exterior components, the ACE 1000 range meets all of your functional and decorative needs. Outstanding resistance to chemicals, corrosion and everyday wear and tear is complemented by superior color retention in a high-gloss, satin or matt finish, to not only keep your vehicle functioning at the highest level, but also looking good all year round. Available with or without TGIC and with low-E, it offers the benefit of curing at lower temperatures to improve production throughout and increase line speeds.

ACE 2000 series: super durable polyester topcoat

The ACE 2000 range is available with or without TGIC and offers super durability, Excellent UV and weather resistance, and protection against corrosion to provide a higher resell value for second-hand vehicle market. Available in matt, satin and high gloss finishes, the range is tested against the most extreme conditions to ensure your heavy equipment is always performing, no matter what the challenge.

ACE Primers

Interpon's easy-to-apply ACE Primers have been tested to the highest specification to protect heavy duty vehicles and equipment from salt spray and chemical corrosion. When combined with a topcoat, the system provides excellent weatherability, durability and edge coverage, as well as being resistant to humidity and impact damage.

ACE Align

ACE Align's dry-on-dry application process allows the primer and topcoat to be applied and cured together, saving time and energy to bring economic advantages, as well as enhancing performance. High levels of corrosion resistance and edge coverage are complemented by excellent adhesion between the substrate, primer and topcoat, to ensure that the coating integrity remains uncompromised, no matter the conditions.

Redox One Coat

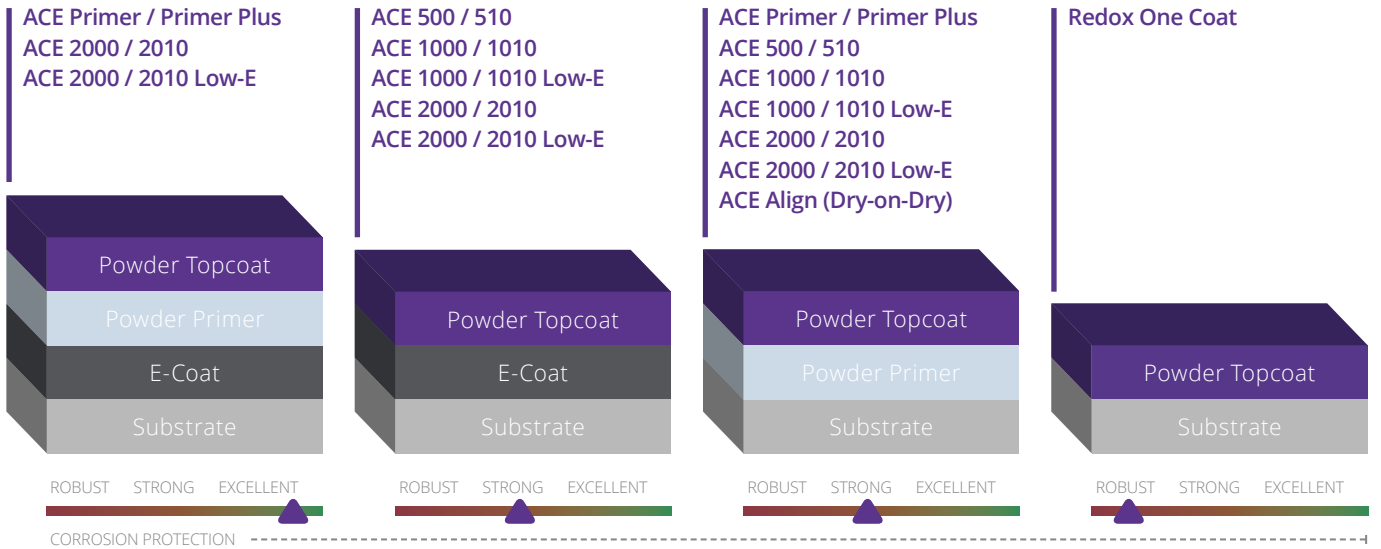

While coatings traditionally requires a primer layer for and corrosion protection, followed by a topcoat for gloss and UV protection, you can now reach corrosion protection up to C4M in a single coat. Using a base chemical pre-treatment like iron phosphate along with Interpon Redox One Coat, you can now deliver good levels of corrosion protection and UV durability for outdoor applications and on Sa2.5 blasted steel, expanding your offering and enhancing your business reputation.

Deciding features

Features	Benefits for the customer
Superior Corrosion and weathering protection	Coating integrity remains uncompromised even in the most severe conditions.
	Less recalls from the market
	High resale value for second-hand sales
High performance portfolio to withstand any type of condition, e.g., mines, ploughing, etc.	Higher gloss and color retention
	High scratch resistance
	Supreme customer satisfaction
Additional products available, such as Low E (dry-on-dry application)	Energy saving
	Increasing line efficiency
	Lower costs per unit
Robust and Durable	Reduced costs as less re-works are needed
Superb color range	Ensuring the perfect solution for every need. Approved OEM color match
OEM Approvals	Confirming the performance and track record of our products

Paint Systems - our offer

AkzoNobel

We supply the sustainable and innovative paints and coatings that our customers, communities – and the environment – are increasingly relying on. That’s why everything we do starts with People. Planet. Paint. Our world class portfolio of brands – including Dulux, International, Sikkens and Interpon – is trusted by customers around the globe. We’re active in more than 150 countries and have set our sights on becoming the global industry leader. It’s what you’d expect from a pioneering paints company that’s committed to science-based targets and is taking genuine action to address globally relevant challenges and protect future generations.
