Interpon Ready-to-Ship (RTS) Gen IV

Life in the fast lane

For businesses like yours, speed is everything. You know if you can't perform, you won't compete, but you want to be fast not furious. Our Interpon range of Ready-to-Ship (RTS) powder coatings are recognized as the best performing products on the market, and with approximately 500 RTS powder coatings to choose from, the new Gen IV portfolio is one of the largest in the industry. It's also our most diverse range yet, with unique chrome, metallic and matte finishes with enhanced textures specially developed for market-specific products.

Leading benefits

You demand the best out of your powder coatings products, and you need them quickly. That's why Interpon comprises the biggest most comprehensive range of high-quality colors, textures and finishes that we can get to you in time for even the most urgent jobs.

As well as speed of delivery and product range, we're also the first choice for those of you who are truly committed to sustainability, who need to deliver stakeholder value but never at the expense of the environment, the people, or the world in which we live. Unlike traditional liquid paints, powder coatings are free of Volatile Organic Compounds (VOCs), create minimum waste, and through

their durable, and superdurable qualities deliver longer-lasting performance.

We are the first choice for those who admire innovation, for we're constantly developing new coatings to keep you one step ahead of the game, recognizing that even the best can always be better.

And we're the first choice for those who see the value in partnerships and experience to make the most out of what you're doing today or make the switch to the new world of possibilities tomorrow.

Ready. Steady. Coat.

AkzoNobel

Deciding features

By 'Ready to Ship', we mean the new portfolio is ready for our customers to order and access in standard and/or smaller batches, through our partners at Prismatic. Our comprehensive range of colors, finishes and textures comprises:

- 320 products matching an industry color standard
- 123 products matching a competitor's color standard
- 100 black colors
- 14 powder primers

Market-specific innovations

We have innovated products and created new technologies to address certain specific industry needs, including:

- Low energy cure
- Bonded metallic
- Monocoat metallic
- Wrinkle finish
- High-yield urethane polyesters
- Low film build
- Unique special finishes
- Trend and design finishes
