

Product Data Sheet

AkzoNobel Powder Coatings Interpon 501 S

Product Description	 Interpon 501S is a sub type of Interpon 500S series and has specific metallic effect, suitable for aluminum substrates. Recommended applications include commercial buildings, curtain walls, residential doors, window frames, ceilings and walls. Interpon 501S is designed for exterior environment, offering excellent long term weather resistance on a single coat finish, while maintaining superior scratch resistance. Interpon 501S is designed to meet or exceed performance requirement of GB5237.4. Interpon 501S is available in a variety of colors. 			
Powder Properties	Chemical type	Polyester		
	Appearance	Depends on specific product		
	Particle Size	Suitable for electrostatic spray		
	Gloss	Depends on specific product		
	Specific gravity	1.2-1.7g /cm ³ (depending on color)		
	Storage	Dry cool conditions below 30 °C		
	Shelf life	6months (<30 °C), 12 months (<25 °C)		
	Stoving schedule	15 minutes at 190°C		
	(object temperature)	10 minutes at 200°C		
		Failure to observe the correct curing conditions may cause difference in		
		colour, gloss and the	deterioration of the coating properties.	
	product performance will o Substrate Pretreatment Film Thickness Stoving Schedule	depend upon the circumstances under which the product is used. Al extrusion qualified Cr3+, Cr6+ or non-Cr pretreated 60-80 microns 10 minutes at 200°C (object temperature)		
Mechanical Tests	Flexibility Adhesion Erichsen Cupping Impact (direct)	GB/T 6742 GB/T 9286 GB/T 9753 GB/T 1732	Pass 3mm, no crack Gt 0 Pass > 5mm Pass-reverse direct, deformation	
	Indentation hardness	GB/T 9275	2.5mm no crack Pass-Minimum 80 with the	
	Boiling Water	GB5237.4-5.4.10	specified required Pass-No detachment of the film, Slight gloss and color change is allowed	
Chemical and Durability Tests	Constant Climate Condensation	GB/T 1740	Pass-1000 hours, no blistering or detachment	
	Mortar Resistance Immersion	GB5237.4-5.4.12	Pass- 24 hours, Gloss loss is slight	
	Accelerate durability	GB/T 1865	Pass-1000 hours	

Interpon 501 S

Corrosion Tests	Acetate Acid Salt Spray	GB/T 10125	Pass-1000 hours,infiltration length<4mm		
	Acid Resistance	GB5237.4-5.4.11	Pass-15 minutes, no blistering or detachment		
Pre-treatment	For maximum protection it is essential to pretreat components prior to the application of Interpon 500S. Aluminum components should receive a full multi-stage chromate conversion coating or suitable chrome-free pre-treatment or suitable chrome-free pretreatment to clean and condition the substrate.				
Application	Interpon 500S powders can be applied by manual or automatic electrostatic spray equipment, however for consistency of finish automatic equipment is preferred. Unused powder can be reclaimed using suitable equipment and recycled through the coating system.				
	Fluidizing air pressure Transport air pressure Recommended voltage	~0.7 bar ~0.7bar 40-90kV			
Damage Repair	Surface preparationSanding + Air cleaningApplicationRecoat : Lower Voltage				
Safety Precautions	When using, do not eat, drink or smoke. Do not breathe the dust. In case of insufficient ventilation wear suitable respiratory equipment. For further information please refer to the specific product Material Safety Data Sheet (MSDS) available on request from your local AkzoNobel sales office.				
Disclaimer	IMPORTANT NOTE: The information in this data sheet is not intended to be exhaustive and is based on the present state of our knowledge and on current laws: any person using the product for any purpose other than that specifically recommended in the technical data sheet without first obtaining written confirmation from us as to the suitability of the product for the intended purpose does so at his own risk. It is always the responsibility of the user to take all necessary steps to fulfill the demands set out in the local rules and legislation. Always read the Material Data Sheet and the Technical Data Sheet for this product if available. All advice we give or any statement made about the product by us (whether in this data sheet or otherwise) is correct to the best of our knowledge but we have no control over the quality or the condition of the substrate or the many factors affecting the use and application of the product. Therefore, unless we specifically agree in writing otherwise, we do not accept any liability whatsoever for the performance of the product or for any loss or damage arising out of the use of the product. All products supplied and technical advices given are subject to our standard terms and conditions of sale. You should request a copy of this document and review it carefully. The information contained in this data sheet is subject to modification from time to time in the light of experience and our policy of continuous development. It is the user's responsibility to verify that this data sheet is current prior to using the product.
