Product Datasheet

BU Powder Coatings Interpon 600

Product Description	Interpon 600 is a series of pol offering very good light and we	lyester based powder coatings designed for the exterior environment, eather resistance.
	Interpon 600 powders are available in a wide range of colours in gloss, satin, matt and textured effects and can be custom matched to the user's requirements.	
Powder Properties	Chemical type Particle size Gloss Specific gravity Storage Shelf life Stoving schedule (object temperature)	Polyester Suitable for electrostatic spray gloss, satin, or matt 1.2-1.8 g/cm ³ (depending on color) Dry cool conditions below 30 °C 6months (<30 °C), 12 months (<25 °C) 15 minutes at 190°C 10 minutes at 200°C 8 minutes at 210°C Failure to observe the correct curing conditions may cause difference in colour, gloss and the deterioration of the coating properties.
Test Conditions	have been carried out under la	based on mechanical and chemical tests which (unless otherwise indicated) aboratory conditions and are given for guidance only. Actual product in the circumstances under which the product is used. Mechanical tests: 0.6mm degreased steel Chemical tests: 0.6mm Zn/Mn phoshated steel – chromated aluminum 60-80 microns 10 minutes at 200°C (object temperature)
Mechanical Properties	Adhesion Pencil hardness (scratch) Cupping Test Impact resistance (direct) Flexibility	$\begin{array}{llllllllllllllllllllllllllllllllllll$
Chemical and Durability Properties	Salt Spray Humidity Distilled Water Immersion Exterior Durability Chemical Resistance	ISO 9227Pass-250 hours, creepage less than 2mm from scribeASTM D1735Pass-1000 hours, no blistering or loss of glossASTM D870Pass-240 hours, no blistering or loss of glossExcellent – no chalking, slight loss of gloss after 12 months continuousexposure but no film breakdown or reduction in protective propertiesGenerally good resistance to most acids , alkalis and oils at normaltemperatures
Pretreatment	Aluminum, steel or Zintec surfaces to be coated must be clean and free from grease. Iron phosphate and particularly lightweight zinc phosphate of ferrous metals improves corrosion resistance. Aluminum substrates may require a chromate conversion coating.	
Interpon 600 Issued: Aug 2014	AkzoNobel Powder Coatings (Vietnam) L Road No 2, Nhon Trach I Industrial Zone Dong Nai Province 71205, Vietnam Ph: +84 61 356 0730 www.interpon.com	

Additional Information **Interpon 600** powders can be applied by manual or automatic electrostatic spray equipment, however for consistency of finish automatic equipment is preferred. Unused powder can be reclaimed using suitable equipment and recycled through the coating system.

Safety Precautions

When using, do not eat, drink or smoke. Do not breathe the dust. In case of insufficient ventilation wear suitable respiratory equipment. For further information please refer to the specific product Material Safety Data Sheet (MSDS) available on request from your local AkzoNobel sales office.

FOR PROFESSIONAL USE ONLY

IMPORTANT NOTE The information in this data sheet is not intended to be exhaustive and is based on the present state of our knowledge and on current laws: any person using the product for any purpose other than that specifically recommended in the technical data sheet without first obtaining written confirmation from us as to the suitability of the product for the intended purpose does so at his own risk. It is always the responsibility of the user to take all necessary steps to fulfill the demands set out in the local rules and legislation. Always read the Material Data Sheet and the Technical Data Sheet for this product if available. All advice we give or any statement made about the product by us (whether in this data sheet or otherwise) is correct to the best of our knowledge but we have no control over the quality or the condition of the substrate or the many factors affecting the use and application of the product. Therefore, unless we specifically agree in writing otherwise, we do not accept any liability whatsoever for the performance of the product or for any loss or damage arising out of the use of the product. All products supplied and technical advice given are subject to our standard terms and conditions of sale. You should request a copy of this document and review it carefully. The information contained in this data sheet is subject to modification from time to time in the light of experience and our policy of continuous development. It is the user's responsibility to verify that this data sheet is current prior to using the product. Brand names mentioned in this data sheet are trademarks of or are licensed to AkzoNobel.
