Superdurable and hyperdurable
powder coatings

Your imagination starts with our finish

AkzoNobel

Interpon Stone Effect Collection

Reputations built in stone

Interpon Stone Effect Collection powder coatings help architects and designers transform metal surfaces, pushing the boundaries of what's possible and giving their creations a beautiful, stone-like appearance.

Available in seven different styles to ensure stunning variations in color and patination, the specialty coating has all the aesthetic qualities of Portland stone, limestone and brickwork, but without the practical challenges and cost that come with installing the real thing. Surfaces protected by Interpon Stone Effect powder coating are lighter, hyperdurable, and easier to handle, so you can enjoy all the benefits of nature, without taking anything from it. It means the weight of environmental responsibility is literally carried light upon your shoulders!

Designed to help architects and designers bring their imaginations to life, our powder coatings meet the needs of the most demanding minds and environments with a shared passion for innovative thinking. For building owners who need their buildings to last and believe in sustainability.

Transparency and reliability

Building a sustainable future

The Interpon Stone Effect range is one of a family of products that is not just helping us to imagine the future; it is also protecting it. Backed by an Environmental Product Declaration (EPD), the raw materials, manufacture and transportation associated with creating Interpon D have been assessed by an independent third-party for transparent sustainability credentials.

Creating futures that last

You can rely on us. Our Stone Effect range delivers on its promised durability levels in terms of color retention and film integrity.

Interpon D2525 Superdurable

AAMA 2604
