

Interpon D STF: Wood Effect Powder Coatings

The key benefit of Interpon D STF is to remove the constraints of wood:

- Overcomes weight considerations of timber
- Environmentally friendly – no solvent emissions
- Design flexibility – provides excellent edge coverage on conventional and multi-faceted pieces
- Virtually maintenance free

Sublimation technology

Sublimation technology is mostly used to transform architectural aluminum components to give them the appearance of wood. Items such as windows, doors, screens, shutters, louvres and even outdoor furniture can be transformed using the sublimation process.

The powder coated aluminum alternative offers all the natural beauty and warm aesthetic appearance of wood without the labor-intensive and costly aftercare requirements associated with choosing a natural finish such as wood.

Performance guarantee

Interpon has a range of globally supported warranties for architectural applications offering peace of mind where long term performance is a must. When applied by an Interpon D Approved Applicator, Interpon D powders also come with a guarantee of performance.

Architecture – The Interpon D Series

AkzoNobel's series of **Interpon D** powder coatings have been in use since the 1980s on architectural metal. Designed to give a long-term, attractive finish, **Interpon D** powders are available to suit every climate and building type. When applied by Approved Applicators, **Interpon D** powders also come with a guarantee of decorative performance.

Interpon D STF Powder Coatings

AkzoNobel was the first company to develop powders for wood effect with sublimation film transfer, and our powders work with film from Miroglio Sublitex and other film suppliers. AkzoNobel's powder coatings offer for the sublimation market is branded **Interpon D STF** (Sublimation Transfer Finish).

Interpon D STF powder coatings from AkzoNobel are suitable for both interior and exterior use.

- ① Aluminum
- ② Pre-treatments
- ③ Powder coating basecoat
- ④ Film Transfer

Series	Powder warranty	Powder only decorative warranty	Color retention (ASTM D2244)	Gloss retention	Chalking (ASTM D4214)
Interpon D2000 STF	25 years	15 years	$\Delta E \leq 5.0$	Gloss loss evenly over total surface with the same exposure	Rating \geq No.8
